RE: Florida Hospital Altamonte Patient Expansion  
Successful Job Completion

Dear Terry:

I wanted to let you know that Berkel has successfully completed another project with Brasfield & Gorrie, and we appreciate your efforts. Specifically, Jason Fox and Claude Hess have performed proactively in resolving project difficulties and in minimizing delays while addressing unforeseen conditions. Their immediate response to the numerous problems we encountered on this project should be commended.

In addition, we had the opportunity to meet several of Berkel's superintendents on this project, Doug Fletchall, Kerry Walker and Tom Parman, all of whom did an excellent job and exhibited a great deal of professionalism, knowledge and skill. Most of all, they showed a determination most admirable, during the encounters with the many large underground voids. My thanks go to them as well.

Please pass this along to those Berkel team members who made this challenging augercast piling installation such a success.

Very truly yours,

Ren Tilden  
Senior Project Manager
