Re: Berkel and Company Reference Letter

To Whom It May Concern:

This letter is to provide reference and confirm that Berkel and Company has recently completed shoring and piling work under contract for Baker Concrete Construction, Inc. Berkel and Company was one of several companies bidding this work and were ultimately selected because they demonstrated a thorough understanding of the project, a clear plan for the scope of work, and committed to a timely mobilization. This work was performed between June of 2012 and January of 2013 on the Carpenter Technology project located in Tanner, AL.

Berkel and Company performed all aspects in a professional manner from bid time through design, installation, and completion of the contracted scope of work. The shoring and piling subcontracted to Berkel and Company fall under the core competencies of their business, and Baker Concrete is completely satisfied with the end result on this project.

If there are any further questions regarding this matter, please feel free to contact me.

Sincerely,

Jerome Kalo
Project Manager
