 Re: Pablo Echeverria - Superintendent

Adam,
 I just wanted to let you know what an outstanding job Pueblo and his crew have done on the Shands Cancer Hospital @ The University of Florida project. Pablo runs a safe "IFE", organized, and productive team. He works hand and hand with the other subcontractors and is willing to go the extra mile to get the job done. I have been with Skanska for over 32 years and the shoring team on this project is hands down the best that I have ever been associated with. It is leaders like Pablo that make SkanskaUSA jobs successful and a pleasure to build.
